my favorite movie is "my boyfriend is a superstar" it all begins when Jessica Olsen, a girl from Michigan, feels the attitude of her sister, obsessed with singer Christopher Wilde, ridiculous. One day he goes with his family to Los Angeles with the only idea of !!! visiting his grandmother, while his sister tries to take advantage of the trip to find Christopher Wilde. But chance will make Jessica the one who finds him. finally Jessica ends up falling in love with the super star. this movie seems incredible to me because we find everything, love, sadness and party this movie I have liked since I was a child this movie is original by disney and it came out in 2010. and I also always see her with my cousins and I love that I never get tired of seeing it.

My favorite movie is "BIG FISH & BEGONIA". This movie is amazing, mind-blowing, with vuivin and animated movements, with forgotten secrets and rules that must not be broken. This film (3* fantasy and magic is not like others since it represents situations that we can see very often with family and their traditions or rules but in this film a girl called "Chun" must find a way to save the soul and life of a Human boy who met and observed in the distance when I go down through the portal of the ocean of the sea and the sky to know the human world and become an adult. When she returns to her house she goes to the sea of 77souls with the hope of finding the boy's soul and the way to save her life so that she returns to earth as a human being. The guardian of this tells her where I should go if she is willing to offer something in return so that he can return home and so he does, he gives half of his life so that "Iuin" can grow up and go to the human world again,but at a very high cost with the death of Chun's friend "Oiun" and the flooding of his world. This movie caused me joy. I was fascinated by how Chun was willing to give her life for Kun and the way she tried to save him despite going against her people.

My favorite movie is "Interestellar". This is a science fiction film that tell us a history about how our planet is almost dry of resources in the 2067and this made farming almost impossible to grow enough natural resources as vegetables endangering the mankind survival. Joseph Cooper, the protagonist, an ex pilot of the NASA, has his own farm with his 2 kids and his father, his little daughter, called Murph thinks that the house is haunted because a serie of weird events happened in her room. Joseph Cooper skeptical about what her daughter says, went in the room and saw a strange event, not a "ghost" but he realized that the gravity is behind this, a message in binary code made of the dust in the bedroom about some kind of coordinates, he, intrigued about this, follow the coordinates that guide him to a NASA building, where he melts his ex-professor, Dr. Brand. This is an interesting and amazing film in my opinion, the footage is precious and i was astonished when i saw some of the scenes, very well made, the cast did a very good job in their performances, is a pretty long film compared to other movies, it is very entertaining because involves a few concepts and theories about the physical sciences, you dont need to know anything about this before u watch this film, because it shows everything very clearly. i bet you will feel as fascinated as i felt.

My favorite movie is Wonder Woman 1984, it is set in the cold war and how Diana and her old love Steve Trevor are facing Maxwell Lord and Cheetah who has superhuman strength and agility.
The plot of the film begins when aspiring businessman Maxwell Lord is visiting the Smithsonian in search of a mysterious Wish Stone that apparently grants wishes. Both Diana and Barbara unknowingly used the stone to satisfy her own desires: Diana wishes her deceased lover Steve Trevor, causing her spirit to manifest and take over another man's body in The real world. For her part, Barbara wishes to become strong and beautiful like Diana, making her wish come true.
When the movie is almost over, Steve convinces Diana to let him go and give up her wish, regaining her strength and after defeating Barbara, Diana confronts Max and uses her Lasso of Truth to communicate with the world, through him, convincing everyone to give up their wishes. Some months later, Diana meets the man whose body Steve lived in, while she continues to protect the world.
This movie made me excited by all the action and kept me entertained by how the story unfolded from its beginning to its end.

Dear Andrea,
Please correct your evidence.
1st. You must write a text file with your own autobiography. (It must be written in present perfect in 3rd person).
Example:
2nd. Please record an audio file reading that script.
Kind Regards.
