NVivo offers the most intuitive data analysis experience, helping you discover even more from your qualitative and mixed methods data.

You have purchased:
- New NVivo - Government Annual License - 5 Users.
  Expiration Date: August 04, 2022.
- Nvivo Transcription - Subscription Service up to 300 hours or a year license.
  Expiration Date: August 04, 2022.

Listed below are the different deploying options for NVivo.

If you are deploying NVivo using a User-Requested Install, you will require your organization's license keys:

NVT20-KZ000-6HA20-OR68C-TOCJR
NVT20-KZ000-6HA20-OQ63C-80KIF
NVT20-KZ000-6HA20-OP6GC-XGRMZ
NVT20-KZ000-6HA20-OO6RC-CQ54A
NVT20-KZ000-6HA20-ON6NC-FOO2T

How To Deploy NVivo:

There are different strategies for deploying NVivo.

You can choose one, or a combination, of these deployment options:

Known User Installation: Grant your users access to NVivo by inviting them through your organization's myNVivo account. This option is ideal when you know the end users' email address.

User-Requested Installation: Provide your NVivo license key and a registration link to your end users, allowing them to register your NVivo key against their own personal myNVivo account. This option is ideal when a user requests access to NVivo.

Scripted Installation: Have your IT department run a script to install and activate NVivo throughout your organization. This option is ideal when you need to install NVivo on multiple machines, such as a computer lab.

Use NVivo on Windows or Mac
Your NVivo enterprise license agreement (ELA) allows installation of NVivo on Windows and Mac computers, providing total usage doesn't exceed the number of seats you have purchased.
