Bogota, Colombia

Dear Sirs:

By means of this letter, I certify that Milton Fernando Montoya, identified with Colombian ID card No. 79,949,127, has successfully developed the postdoctoral research work called "The New Reality of Participation of Local Authorities in Mining Projects in Colombia: Interpretation of constitutional principles, new opportunities and participation mechanisms".

This postdoc research, which has fulfilled all the objectives, has been developed under my supervision at the Centre for Energy, Petroleum and Mineral Law and Policy (CEPMLP) of the University of Dundee between June 2016 and December 2016.

The development of this important paper for the Colombian mining sector is an example of the successful academic cooperation relationship between the University of Dundee and Universidad Externado de Colombia. Between these two universities there has been an important academic relationship since 2011, enriched with the exchange of students, professors and, now, productive research activity.

We attach to this letter the full postdoc research paper and I appreciate the support provided to this important academic project.

Kind regards,

Prof. PETER CAMERON PhD FRSE FCIArb
Director of Centre for Energy, Petroleum and Mineral Law and Policy (CEPMLP)
Professor of International Energy Law and Policy
School of Social Sciences
University of Dundee
