Self Awareness and the Effective Leader

Relationship Management

Personal Leadership Development Planning and Leading High Performing Teams

Mar 9, 2021

David Van Kleeck
Professor in the Practice of Engineering Leadership
Rice Center for Engineering Leadership

Nicole Stephany Dosman Riofrio

has successfully completed the online, non-credit Specialization

Leadership Development for Engineers

Professional engineers who want to advance in their careers need to be able to effectively and efficiently lead a team. The Self Awareness course take you through an in depth examination of your personal strengths and weaknesses. You learn how to leverage your strengths in a leadership role and how your weaknesses may effect your leadership style. The Managing Relationships course is all about relationships: building them and the importance of effective communication, productive meetings and gaining influence among your peers. In the Action Planning course, you set goals and develop action-oriented plans to reach them. You learn how to set up a creative environment for your team to work and how to motivate them to reach their potential.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
