Tony
I was 13 when I started playing the guitar. My parents are classical musicians, so they encouraged me to play the violin when I was five, I think, and piano when I was eight. I certainly picked up some fundamentals from all that. I didn't really care for it at that time. When you're a boy that age, you just want to play with your favorite star-team action figures and be a football player pretty much.

David
Well, ever since primary school, I knew I wanted to play an instrument. When I saw the middle school orchestra playing, I knew it was something I wanted to be a part of. The sixth form was the first opportunity I had to start learning an instrument. At first, my best teacher told me to play the trumpet, so I went to the local music shop to try one out. I picked up the trumpet, put it to my lips, and I couldn't make a sound.

Alina
My dad inspired me to start learning classical music, and over the years, I've developed a growing passion for it and decided to move forward with it and pursue it as my career. My piano idol is Frédéric Chopin, a Polish composer full of emotions reflected in his beautiful music. I usually practice after school on weekdays for about an hour, but I sometimes take a few days off. I seem to play better when I return to the instrument.

TO THE MOON

In 1969, three people in a tiny spaceship made history with a trip the world will never forget. NASA officials selected Michael Collins, Edwin "Buzz" Aldrin, and Neil Armstrong. The trip named Lunar landing mission was called Apollo 11, and their destination was the Moon. Tens of thousands of people worked on the Apollo project to send those three to the Moon. The project, also known as the Apollo program, took ten years of preparation.

The first Apollo flight was a disaster because the spacecraft caught fire on the ground. But NASA rostered with the Apollo program. During future space missions, the astronauts practiced flying their space crafts. They also performed the tasks they needed to know so that they were able to fly to the Moon and land on it. On the Apollo 8 mission, the astronauts flew around the Moon ten times. They were almost ready for the first Moon landing. The rocket that carried the spacecraft and the astronauts into orbit around the Moon was called the Saturn 5. It blasted through space at a speed of at least 25 kilometers per hour. Even at that speed, it took 3 days, 3 hours, and 49 minutes to reach the Moon. The Apollo 11 mission used a lunar module designed only for landing on the Moon. It was called the "Eagle." On July 20, 1969, the Eagle landed on the Moon's desolate surface. Only two astronauts stepped on the Moon that day. Neil Armstrong became the first person to walk on the Moon. Edwin "Buzz" Aldrin followed about twenty minutes later. The astronauts set up a TV camera, and the whole world watched the landing on TV. Michael Collins waited for them in the spacecraft and orbited the Moon. His job was to take care of the spacecraft that would take them back home. He had to make sure nothing happened to it!

Después leyó de pregunta, se pide una comprensión de lectura más profunda, donde se debe hacer una lectura crítica para llegar a una conclusión acerca de la lectura.

ARTICLE

O'Connell Street is the main thoroughfare and is one of the busiest shopping streets in Dublin. Even though it is not a very long street, the locals will proudly tell the visitor that it is the widest street in Europe. This claim often meets with protests, especially from French people, claiming the Champs Elysees of Paris as Europe's widest street. But the witty Dubliners won't easily relinquish bragging rights and will trump the French visitor with a new distinction: The Champs Elysees is an avenue, O'Connell is a street.

Dubbed by a few famous monuments running the length of its centre, the street is no most after Daniel O'Connell, an Irish patriot. His monument stands at the lower end of the road, facing O'Connell Bridge. O'Connell stands high above the business people, tethered crowds of shoppers and students on a large column, surrounded by four angels representing Patriotism, Courage, Eloquence, and Fidelity.

Further up the street on the other side is the famous General Post Office or the GPO, as Dubliners call it. During the Easter Rising of 1916, the GPO was taken over by the Irish volunteers on Easter Monday and occupied by the revolutionary forces, sparking weeks of armed combat in the heart of Dublin. To this day, three of the angels bear bullet holes - two with a wound in the chest and one in its left arm.

1.) What is the writer's main purpose in writing the text?
   - ① to explain what it's like to be Irish
   - ② to describe historical sights on Dublin's O'Connell Street.
   - ③ to introduce readers to the biography of Daniel O'Connell
   - ④ to show how difficult being a Dubliner can be.

   - ① is the widest street in the world.
   - ② is the widest street in Europe.
   - ③ is the longest street in all of Europe.
   - ④ wider than it is long.

3. What does the author say about the Irish people?
   - ① They are talkative and playful.
   - ② They are rebellious and do not like foreigners.
   - ③ They never agree with French people.
   - ④ They are clever and funny.

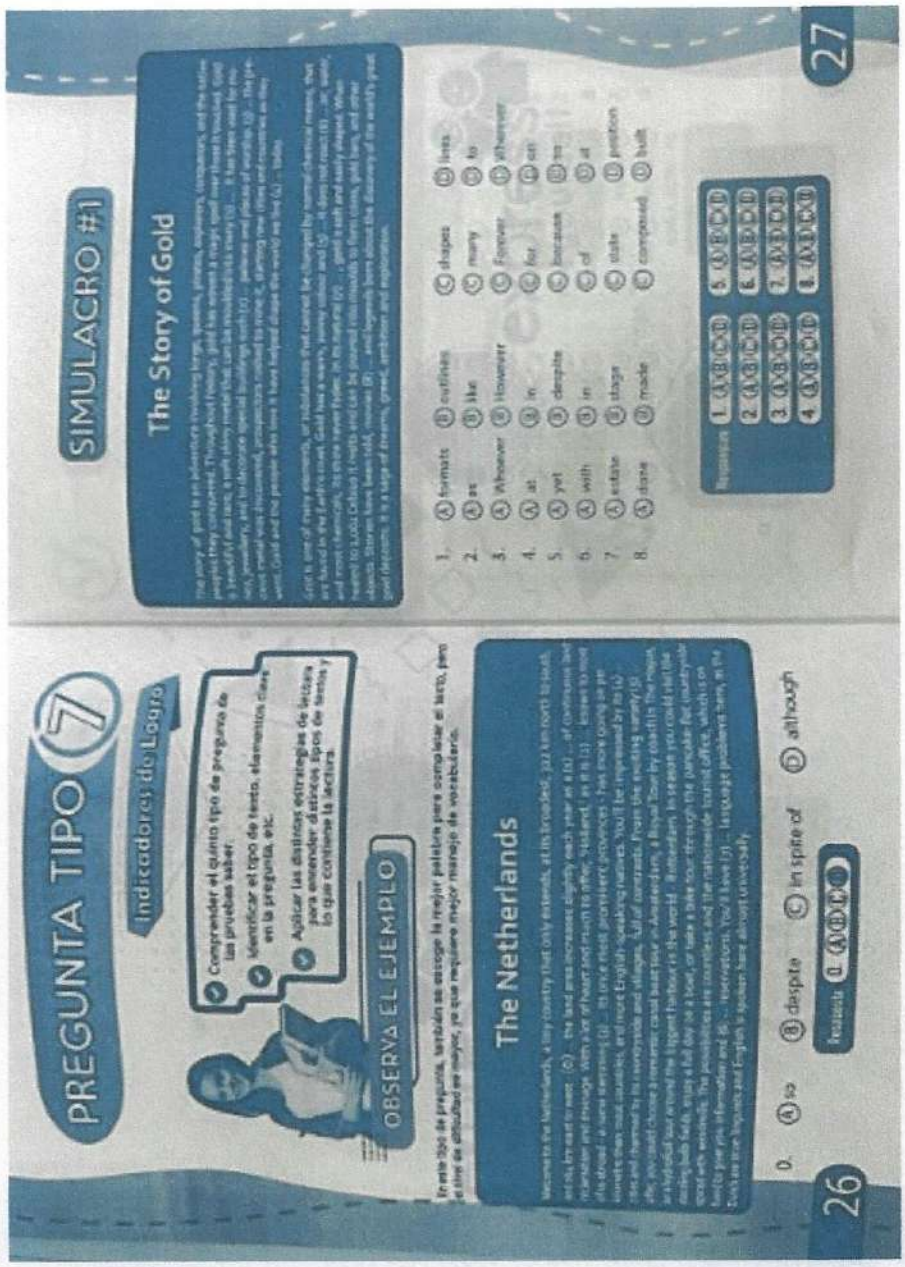

4. The Daniel O'Connell statue stands...
   - ① opposite O'Connell Bridge.
   - ② behind the General Post Office.
   - ③ at the upper end of the street.
   - ④ far away from the city centre.
