MUNICIPIO: Castigleir

NOMBRE DE LA MODALIDAD: 1- amilias - fami

NOMBRE DEL SERVICIO O FORMA DE OPERACIÓN: _____

RACIÓN: Mensual 7 Vacaciones o Receso Otro Especial:
 MES DE ENTREGA: Mayo - 2013

PROFESOR DE LA AS: Paiz Soñal

COMEDIO DEL PUNTO DE ENTREGA ALIMENTO DE ALTO VALOR NUTRICIONAL: _____

1. The following information is required to be filled in by the applicant:

[illegible]

Observaciones:

Final: Elaine Pando Jr

Nombre legible de quien entrega:

NUMERO DE LA MODALIDAD: Familias - dom

MES DE ENTREGA: JANUÁRIO - 2073

DIRECCIÓN DEL PUNTO DE ENTREGA ALIMENTO DE ALTO VALOR NUTRICIONAL.

Figure 1 illustrates the experimental design, showing the sequence of events and the corresponding performance levels over time. The design is divided into four main sections: Pre-Test, Training, Transfer, and Retention. Each section includes a timeline of events and a graph of Performance (Y-axis) versus Time (X-axis).

- Pre-Test:** This section includes a Pre-Test and a Post-Test. The performance level is relatively stable, with a slight increase from Pre-Test to Post-Test.
- Training:** This section includes a Training phase and a Post-Test. Performance increases significantly during the Training phase and remains high at the Post-Test.
- Transfer:** This section includes a Transfer phase and a Post-Test. Performance decreases significantly during the Transfer phase and remains low at the Post-Test.
- Retention:** This section includes a Retention phase and a Post-Test. Performance remains low during the Retention phase and shows a slight increase at the Post-Test.
