15. OBSERVACIONES

[illegible]

1. *Staphylococcus aureus* (Staph. aureus) is a common cause of skin infections. It is a Gram-positive, spherical bacterium that is often found in clusters. It is highly resistant to many antibiotics and can cause a wide range of infections, including abscesses, boils, and impetigo. It is also a common cause of food poisoning and can be found in the nose and on the skin of healthy individuals.
