1. Análisis del Mercado

1.1 iSector al cual pertenece

El sector servicios o sector terciario es el sector económico que engloba las actividades relacionadas con los servicios no productores o transformadores de bienes materiales. Generan servicios que se ofrecen para satisfacer las necesidades de cualquier población en el mundo.

Incluye subsectores como comercio, comunicaciones, centro de llamadas, finanzas, turismo, hostelería, ocio, cultura, espectáculos, la administración pública y los denominados servicios públicos, los presta el Estado o la iniciativa privada (sanidad, educación, atención a la dependencia), entre otros.

Dirige, organiza y facilita la actividad productiva de los otros sectores (sector primario y sector secundario). Aunque se le considera un sector de la producción, propiamente su papel principal se encuentra en los dos pasos siguientes de la actividad económica: la distribución y el consumo.

El sector de servicios económicos o sector terciario se compone de áreas de la economía tales como:
• Comercio (mayorista, minorista, franquicias)
• Actividades financieras (banca, seguros, bolsa y otros mercados de valores)
• Servicios personales, los más importantes de los cuales son los que se identifican con el estado de bienestar (especialmente educación, sanidad y atención a la dependencia -
servicios públicos, se presten por el Estado o por la iniciativa privada), pero también otros (como las peluquerías)
• Servicios a empresas de cualquier sector, como la gestión y administración de empresas (incluyendo el nivel ejecutivo), la publicidad y las consultorías y asesoramientos económico, jurídico, tecnológico, de inversiones, etc.
• Función pública, administración pública, actividades de representación política y de servicios a la comunidad, como las actividades en torno a la seguridad y defensa (ejército, policía, protección civil, bomberos, etc.) y las actividades en torno a la justicia (jueces, abogados, notarios, etc.)
• Hotelería y las actividades en torno al turismo
• Las actividades en torno al ocio, la cultura, el deporte y los espectáculos, que incluyen las llamadas industrias audiovisuales o de imagen y sonido (industria musical, industria cinematográfica y similares, como los videojuegos); la industria editorial se incluye, con las artes gráficas, entre los sectores industriales (es decir, en el sector secundario)
• Transporte y comunicación (según se trasladan mercancías o información)
• Medios de comunicación, especialmente los medios de comunicación de masas o sociales (periodismo escrito -prensa-, radio y televisión)
• Telecomunicaciones, especialmente los medios personales (telefonía)
• Otras aplicaciones de las tecnologías de la información y la comunicación (TIC), especialmente la informática e Internet. El sector de servicios económicos o sector terciario se compone de áreas de la economía tales como:
• Comercio (mayorista, minorista, franquicias)
• Actividades financieras (banca, seguros, bolsa y otros mercados de valores)
• Servicios personales, los más importantes de los cuales son los que se identifican con el estado de bienestar (especialmente educación, sanidad y atención a la dependencia -servicios públicos, se presten por el Estado o por la iniciativa privada), pero también otros (como las peluquerías).
1.2 Definiciones

1.3 Generalidades del Servicio

El mantenimiento preventivo y correctivo automotriz consta de una serie de revisiones y ajustes que se efectúan en un tiempo determinado para disminuir las probabilidades de fallas o desgastes que amerite una reparación costosa del vehículo.

El mantenimiento preventivo es una práctica periódica que toda persona debe asumir al conducir un vehículo. Siendo este una máquina que tiende al desgaste de cada una de sus partes, es compromiso del conductor chequear de manera frecuente el estado y funcionamiento de las mismas.

El objetivo de este mantenimiento del vehículo es chequear el funcionamiento de partes y sistemas más importantes del vehículo como llantas, batería, sistema de frenos, de suspensión, de iluminación, escape, entre otros.

De conformidad con las normas legales vigentes en Colombia, en particular el TÍTULO II - RÉGIMEN NACIONAL DE TRÁNSITO CAPÍTULO III – VEHÍCULOS *"ARTÍCULO 28. CONDICIONES TÉCNICO-MECÁNICA, DE GASES Y DE OPERACIÓN. Modificado por el art. 8, Ley 1383 de 2010. Para que un vehículo pueda transitar por el territorio nacional, debe garantizar como mínimo el perfecto funcionamiento de frenos, del sistema de dirección, del sistema de suspensión,*

del sistema de señales visuales y audibles permitidas y del sistema de escape de gases; y demostrar un estado adecuado de llantas, del conjunto de vidrios de seguridad y de los espejos y cumplir con las normas de emisión de gases que establezcan las autoridades ambientales"1.

El estado de un vehículo guarda una estrecha relación con la seguridad vial, cuantos más años y distancia recorrida tiene, más hay que cuidarlo y revisarlo; por ello se resaltan factores que más influyen en la seguridad vial.

La seguridad vial incluye todos los elementos que entran en contacto cuando se lleva a cabo la actividad de desplazarse. Incluye la señalización de los lugares por donde se transita, las condiciones del terreno, el estado de los vehículos sobre los que se transportan las personas y, en especial, la actitud de los conductores al volante.

La Gobernación de Córdoba para la presente contratación considera que el proponente debe contar con una adecuada infraestructura física, personal calificado y cercanía geográfica para la eficiente prestación del servicio, cumpliendo con las medidas de seguridad necesarios minimizando los riesgos que se puedan presentar durante la ejecución del contrato.

1.3 ANALISIS MACROECONOMICO

1.3.1 Producto Interno Bruto (PIB)[2]

El Producto Interno Bruto crece 7,5% en el año 2022pr respecto al año 2021p (ver tabla 1). Las actividades económicas que más contribuyen a la dinámica del valor agregado son:

• Comercio al por mayor y al por menor; Reparación de vehículos automotores y motocicletas; Transporte y almacenamiento; Alojamiento y servicios de comida crece 10,7% (contribuye 2,1 puntos porcentuales a la variación anual).

• Industrias manufactureras crece 9,8% (contribuye 1,2 puntos porcentuales a la variación anual).
• Actividades artísticas, de entretenimiento y recreación y otras actividades de servicios; Actividades de los hogares individuales en calidad de empleadores; Actividades no diferenciadas de los hogares individuales como productores de bienes y servicios para uso propio crece 37,9% (contribuye 1,2 puntos porcentuales a la variación anual).

En el cuarto trimestre de 2022pr, el Producto Interno Bruto en su serie original, crece 2,9% respecto al mismo periodo de 2021pr (ver tabla 1). Las actividades económicas que más contribuyen a la dinámica del valor agregado son:

• Actividades artísticas, de entretenimiento y recreación y otras actividades de servicios; Actividades de los hogares individuales en calidad de empleadores; Actividades no diferenciadas de los hogares individuales como productores de bienes y servicios para uso propio crece 40,5% (contribuye 1,3 puntos porcentuales a la variación anual).

• Actividades financieras y de seguros crece 8,4% (contribuye 0,4 puntos porcentuales a la variación anual).

• Industrias manufactureras crece 2,7% (contribuye 0,3 puntos porcentuales a la variación anual).
Respecto al trimestre inmediatamente anterior, el Producto Interno Bruto en su serie ajustada por efecto estacional y calendario crece 0,7%. Esta variación se explica principalmente por la siguiente dinámica:

1.3.2 Inflación

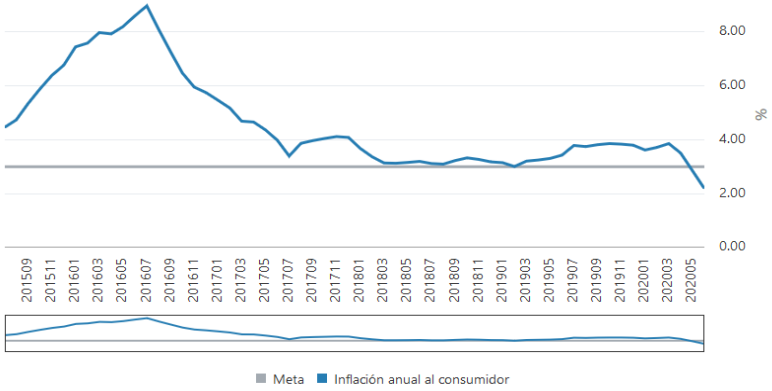

La inflación como indicador macroeconómico, permite medir la valoración de los precios (valor del dinero) de la economía y genera un estándar frente la paridad de poder adquisitivo que pueden llegar a tener los agentes económicos en cuanto se pueden enriquecer o empobrecer, con la misma cantidad de dinero, según el nivel de los precios del mercado. En Colombia, la meta de inflación es fijada por la Junta Directiva del Banco de la República (JDBR). Esta meta hace referencia a la inflación de precios al consumidor a fin de cada año, la cual se mide como la variación doce meses del Índice de Precios al Consumidor (IPC), calculado por el Departamento Administrativo Nacional de Estadística – DANE -.3

Colombia, en términos de su inflación anual al consumidor, como país en desarrollo, ha tenido bastantes inconvenientes en sus niveles de precios reflejados en el desempeño de los consumidores en la economía. Sin mayores tecnicismos, es claro como a lo largo de los años la lucha constante ha sido el no superar la meta de inflación definida por el Banco de la Republica en propósito de no encarecer los mercados y hacer más “pobre” a los consumidores. Aun así, históricamente Colombia se ha mantenido por encima de su meta de inflación y pocas veces ha estado por debajo de

3 https://www.banrep.gov.co/es/estadisticas/inflacion-total-y-meta

ella. Es de considerar, por lo tanto, como en el año 2019 se pudo al menos estandarizar dichos valores estando, si bien es cierto, por encima la mayoría de los meses del año, pero a niveles mucho más estacionarios en comparación con otros años de crisis económica.

INFLACIÓN TOTAL Y META DE INFLACIÓN CORRIDO MENSUAL (5 AÑOS)

1.3.3 Mercado Cambiario (TRM - Peso por dólar)

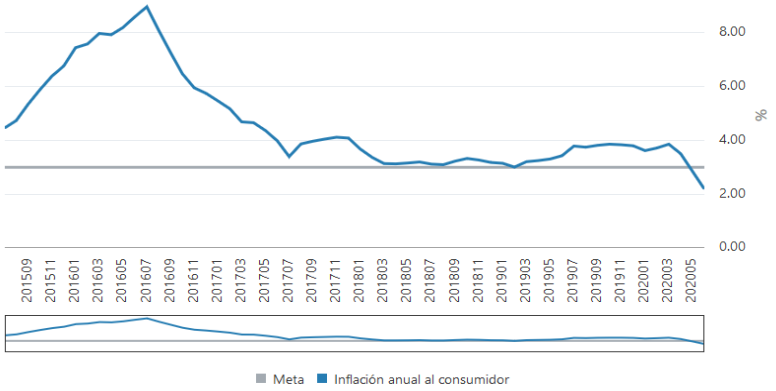

La tasa de cambio representativa del mercado (TRM) es la cantidad de pesos colombianos por un dólar de los Estados Unidos. La TRM se calcula con base en las operaciones de compra y venta de divisas entre intermediarios financieros que transan en el mercado cambiario colombiano, con cumplimiento el mismo día cuando se realiza la negociación de las divisas.

Actualmente la Superintendencia Financiera de Colombia es la que calcula y certifica diariamente la TRM con base en las operaciones registradas el día hábil inmediatamente anterior.

La importancia de tener en cuenta esta tasa en un análisis macroeconómico, es que en muchos sectores productivos los bienes que conforman los procesos transaccionales se regulan en dólares ya sea porque en su mayoría o gran parte de ellos son importados, para el caso de bienes tangibles o por lo determinante que puede llegar a ser esta variable en los mercadores financieros que transan divisas, valores, acciones, etc. (bienes intangibles).

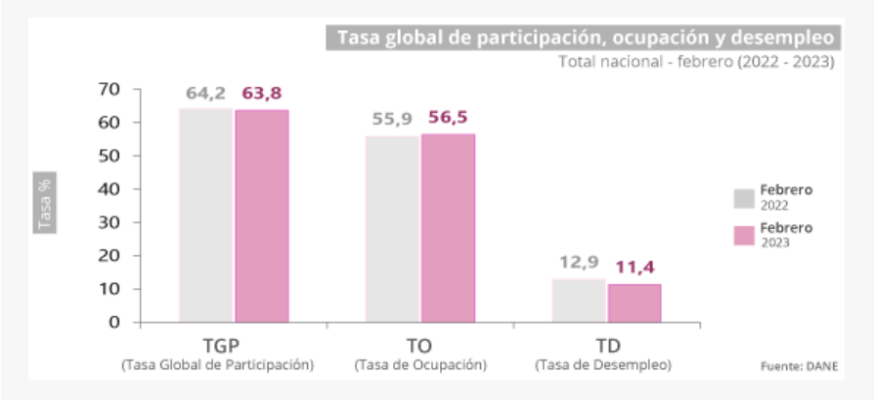

Por tales motivos, se presenta a continuación la evolución de la TRM dentro de los últimos 10 años, con el fin de logar analizar como este cambio de valor tiene una correlación directa con el desempeño de los principales sectores económicos y en gran medida con el que compete al sector analizado: el sector construcción.

VARIACION TASA REPRESENTATIVA DEL MERCADO COLOMBIANO (TRM)

1.3.4 Tasa laboral[4]

Para el mes de febrero de 2023, la tasa de desempleo del total nacional fue 11,4%, lo que representó una reducción de 1,6 puntos porcentuales respecto al mismo mes de 2022 (12,9%). La tasa global de participación se ubicó en 63,8%, lo que significó una reducción de 0,4 puntos porcentuales respecto a febrero de 2022 (64,2%). Finalmente, la tasa de ocupación fue 56,5%, lo que representó un aumento de 0,6 puntos porcentuales respecto al mismo mes de 2022 (55,9%).

En el trimestre móvil diciembre 2022 - febrero de 2023, la tasa de desempleo de las 13 ciudades y áreas metropolitanas fue 12,3%, lo que representó una disminución de 0,7 puntos porcentuales respecto al trimestre móvil diciembre 2021 - febrero de 2022 (13,0%). La tasa global de participación se ubicó en 65,5%, lo que significó un aumento de 1,4 puntos porcentuales frente al trimestre móvil diciembre 2021 – febrero de 2022 (64,2%). Finalmente, la tasa de ocupación fue 57,5%, lo que representó un aumento de 1,7 puntos porcentuales respecto al trimestre móvil diciembre 2021 - febrero de 2022 (55,8%).

1.3.5 Salario Mínimo

En los últimos 10 años, el salario mínimo mensual legal vigente (SMMLV) en Colombia ha crecido en promedio un 5,5%. En particular el SMMLV para 2022 fue fijado con un crecimiento de aproximadamente el 10% frente al observado en 2021.

Fuente: Diario la Republica

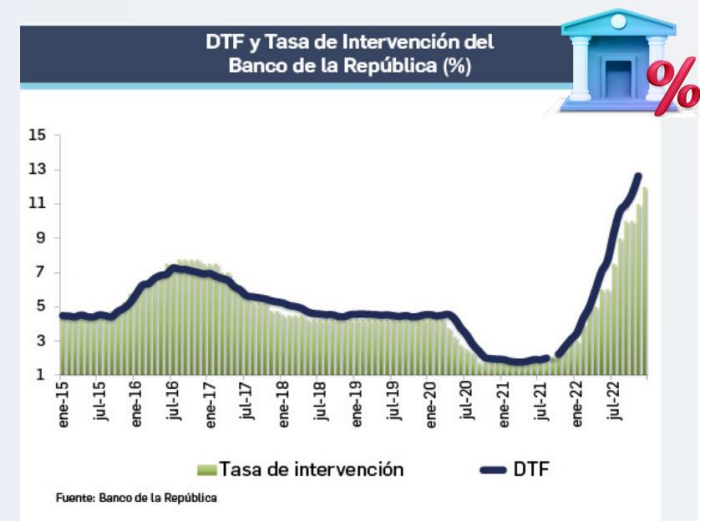

El ajuste del salario mínimo no necesariamente implica que todos los salarios en la economía se muevan en la misma dirección ni mucho menos en la misma magnitud. Actualmente, el salario mínimo del país representa aproximadamente el 86,2% del salario mediano y el 57,3% del promedio de los salarios de las personas ocupadas en el país. Estos porcentajes indican que muchos trabajadores reciben remuneraciones inferiores al mínimo legal establecido. La situación dentro de las regiones del país es aún más compleja. El salario mínimo está por encima del ingreso mediano y promedio en las regiones más pobres y de menor productividad donde, por esa misma razón, la informalidad -en la que no se respetan los mínimos salariales establecidos en las normas legales es particularmente alta.

El incremento del salario propuesto tiene como consecuencia un impacto en la inflación. Si bien en muchos sectores económicos el costo adicional de la mano de obra puede ser absorbido por los empresarios, en otros más afectados por la pandemia como el sector hotelero o los medios pueden tener impactos significativos en su rentabilidad que pueden desestabilizarlos financieramente.

1.3.6. Tasas de Interés[5]

Con respecto a la tasa de interés, luego de mantener estable la tasa de intervención en 1,75% entre septiembre de 2020 y agosto de 2021 el Banco de la República ante el aumento en la inflación al consumidor por encima del rango meta y las expectativas sobre altos crecimientos de los precios, en septiembre de 2021 inició un proceso de aumento de las tasas de interés situándola al cierre del 2022 en 12%, nivel que no se tenía desde febrero de 2001. Los aumentos de las tasas de intervención se han venido trasladando a los mercados y ya para la tercera semana de diciembre la tasa DTF se ubicó en 13,09%.

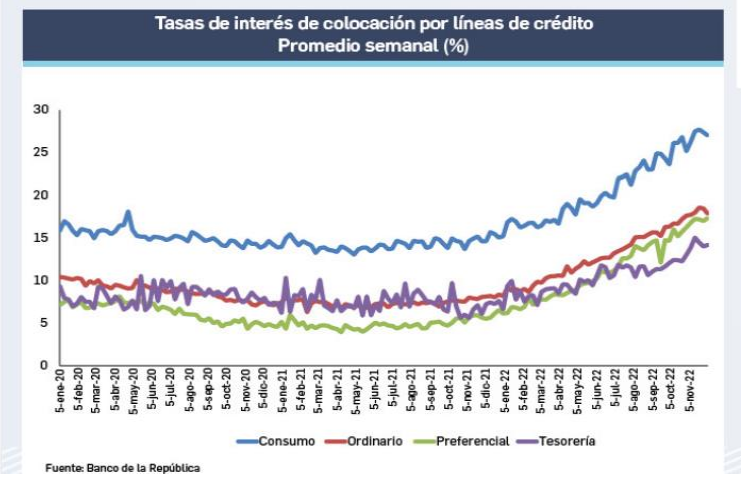

[5] https://www.andi.com.co/Uploads/INFORME%20PERSPECTIVAS%20ANDI%202023.pdf

El aumento reciente en la tasa de intervención parcialmente se ha venido también trasladando a las tasas de colocación. En efecto, la tasa de colocación reportada por el Banco de la República pasó de 8,2% en mayo de 2021 a 9,9% en diciembre de 2021 y a 20,3% en noviembre de 2022.

Por líneas de crédito, también se observa una tendencia creciente desde sepGembre de 2021, especialmente en la línea de crédito de consumo donde la tasa se ubicó para la primera semana de diciembre de 2022 en promedio en 27%. La tasa de interés sobre créditos ordinarios es 17,9%, sobre créditos preferenciales y corporaGvos 17,4% y sobre créditos de tesorería en 14,2%.

1.4 Aspectos Económicos

- **Cambios en los presupuestos:**

Se podría alterar presupuestalmente el objeto del presente estudio si las condiciones requeridas para la prestación del servicio y suministro de los bienes, previamente detalladas en las actividades y/o requerimientos sufren alteraciones de tipo funcional no contempladas dentro de los riesgos contractuales.

- **Cambios en las formas de adquisición:**

Atendiendo a la necesidad de la prestación de servicio, la forma de adquisición siempre arrojará iguales condiciones económicas.

- **Fluctuaciones del valor de las materias primas y costos de producción:**

Se vería afectado en la medida que se deje de fortalecer la capacidad técnica y logística para la ejecución del servicio contratado.

- **Inflación, devaluación y otros índices económicos:**

Las empresas que prestan este tipo de servicios pueden verse afectadas de manera directa o indirecta por los movimientos cambiarios, lo anterior se debe a que el país es importador activo de productos de la industria automotriz, los cuales son bienes objeto de la presente contratación, la variación en la tasa de cambio afectaría los costos de la empresa y por ende los precios finales del mercado, por esta razón existirá la volatilidad y fluctuación de la divisa frente al peso cada mes.

- **Precio:**

El valor del presupuesto oficial ha sido determinado teniendo en cuenta la naturaleza de los bienes requerido y los servicios a prestar y ajustado a los precios del mercado, los cuales de acuerdo al Estatuto Tributario Nacional y según la naturaleza del servicio que la Entidad pretende adquirir en la presente contratación, se aplicara la tarifa general del Impuesto sobre las ventas del diecinueve por ciento (19%). De igual manera, se aplicarán los correspondientes impuestos y estampillas de carácter nacional, departamental, y territorial dependiendo el lugar de ejecución de los diferentes eventos y actividades que se llevarán a cabo en cumplimiento del objeto contractual, los cuales inciden de manera directa en el establecimiento del precio.

- **Objeto**: Encontramos que las entidades contratan los servicios requeridos bajo la denominación mantenimiento correctivo y preventivo.
- **Oferta del Servicio:** El respecto de las especificaciones técnicas, supervisar la ejecución de las actividades administrativas, técnicas y legales establecidas, la sujeción al presupuesto y al cronograma asignado, y el cumplimiento de las mismas.
- **Modalidad de contratación**: Los procesos consultados han sido contratados a través de diferentes modalidades, conforme al análisis anterior y a la experiencia que ha tenido la entidad durante las vigencias anteriores con la celebración de contratos de prestación de servicios con objeto similar, para el caso en mención en atención a las modalidades y reglas de contratación dispuestas en el artículo 2 de la ley 1150 de 2007 se concluye que la mejor alternativa para la adquisición de los servicios es a través de un proceso de selección abreviada de menor cuantía.
- **Oferentes presentados**: Se evidencia que, para este tipo de procesos los oferentes se presentan en su mayoría bajo la figura de personas jurídica. Para el presente proceso de selección existe diversidad de oferentes logísticos con capacidad para asumir de manera global la prestación de los servicios garantizando la calidad, organización y oportunidad, dando primacía a los principios de economía, eficiencia y transparencia.
- **Entidad**: Se han publicado por entidades del estado procesos similares al presente proceso de selección, los cuales han estado sujetos a la reglamentación vigente en materia de contratación estatal.
- **Garantías**: Se evidencia exigencia de múltiples garantías para el amparo de los procesos.

En conclusión, se pudo evidenciar de manera generalizada para este análisis, que el mercado estatal se comporta de forma muy parecida con relación al objeto que se pretende satisfacer y la manera como contrata la Entidad.

3. Análisis de la Oferta

3.1 Identificación de proveedores

De acuerdo a lo establecido con la estructura Detallada de la Clasificación Industrial Internacional Uniforme adaptada para Colombia - CIIU Rev. 4 AC, el mantenimiento de vehículos, se encuentra ubicado en la sección G " Comercio al por mayor y al por menor; reparación de vehículos automotores y motocicletas", en la división 45 - grupo 452 - clase 4520.

Sección G

Comercio al por mayor y al por menor; reparación de vehículos automotores y motocicletas

División	Grupo	Clase	Descripción
División 45			Comercio, mantenimiento y reparación de vehículos automotores y motocicletas, sus partes, piezas y accesorios
	451		Comercio de vehículos automotores
		4511	Comercio de vehículos automotores nuevos
		4512	Comercio de vehículos automotores usados
	452	4520	Mantenimiento y reparación de vehículos automotores
	453	4530	Comercio de partes, piezas (autopartes) y accesorios (lujos) para vehículos automotores
	454		Comercio, mantenimiento y reparación de motocicletas y de sus partes, piezas y accesorios
		4541	Comercio de motocicletas y de sus partes, piezas y accesorios
		4542	Mantenimiento y reparación de motocicletas y de sus partes y piezas

De acuerdo con los Códigos Estándar de Productos y Servicios de Naciones Unidas (UNSPSC) proporcionados por Colombia compra eficiente, el presente servicio, se puede ubicar en:

GRUPO	SEGMENTO	FAMILIA	CLASE
(F) Servicios	(78) Servicios de transporte, almacenaje y correo.	(18) Servicio de mantenimiento o reparaciones de transportes.	(15) Servicio de mantenimiento y reparaciones de vehículo

Actualmente en Colombia y más exactamente en Córdoba existe una gran variedad de prestadores de los servicios requeridos por la Entidad, lo que se debe a que el desarrollo de este sector ha creado nuevos servicios y empleos

3.2 Indicadores Financieros

El análisis de los Indicadores Financieros y de Capacidad Organizacional contempla la realización de un estudio de las Capacidades Financieras y organizacionales de las empresas del sector. 7Estos indicadores son herramientas que se diseñan utilizando la información financiera de la empresa, y son necesarias para medir la estabilidad, la capacidad de endeudamiento, la capacidad de generar liquidez, los rendimientos y las utilidades de la entidad, a través de la interpretación de las cifras, de los resultados y de la información en general. Los indicadores financieros permiten el análisis de la realidad financiera, de manera individual, y facilitan la comparación de la misma con la competencia y con la entidad u organización que lidera el mercado.

La capacidad financiera y organizacional requerida para un proceso de contratación debe ser adecuada, proporcional a la naturaleza y al valor del contrato, en consecuencia, la Gobernación de Córdoba debe establecer los requisitos financieros con base en conocimientos del sector, análisis, estadísticas y proyecciones de lo que se va a contratar.

La Gobernación de Córdoba para el análisis de los indicadores financieros y organizacionales contenidos en el artículo 2.2.1.1.1.5.3. Del Decreto 1082 de 2015, consulto la base de los estados financieros publicados por la Superintendencia de Sociedades en el portal Sistema Integrado de Información Societaria SiiS con corte 2021, evaluó la situación financiera de las empresas que presentan el servicio de Mantenimiento y reparación de vehículos automotores. Para efectos filtró el código CIIU G4520 para conocer los resultados financieros donde se evidenció información para la actividad económica mencionada anteriormente.

En la siguiente tabla, se relacionan los correspondientes indicadores financieros de todas las empresas que reportaron información, calculados por la actividad Económica **G4520 - Mantenimiento y reparación de vehículos automotores**, los cuales se tomaron como base para establecer los indicadores del actual proceso.

La Gobernación de Córdoba utilizó medidas de dispersión como la desviación estándar en conjunto con la media aritmética o promedio para caracterizar las variables financieras, para definir los indicadores numéricos de capacidad financiera y organizacional. Se estableció para todos los indicadores financieros, la utilización de la media de la muestra y la desviación estándar.

En matemáticas y estadística, **la media aritmética**, también llamada promedio o media, de un conjunto finito de números es el valor característico de una serie de datos cuantitativos, objeto de estudio que parte del principio de la esperanza matemática o valor esperado, se obtiene a partir de la suma de todos sus valores dividida entre el número de sumandos. Cuando el conjunto es una muestra aleatoria recibe el nombre de media muestral siendo uno de los principales estadísticos muéstrales.

Dados los n números $\{x_1, x_2, \ldots, x_n\}$, la **media aritmética** se define como:

$$\bar{x} = \frac{1}{n}\sum_{i=1}^{n} x_i = \frac{x_1 + x_2 + \cdots + x_n}{n}$$

La desviación estándar es la medida de dispersión más común, que indica qué tan dispersos están los datos con respecto a la media. ... El símbolo σ (sigma) se utiliza frecuentemente para representar la desviación estándar de una población, mientras que s se utiliza para representar la desviación estándar de una muestra.

La fórmula para la desviación estándar poblacional es:

$$\sigma = \sqrt{\frac{1}{N}\sum_{i=1}^{N}(x_i - \mu)^2}$$

donde N es el tamaño de la población y μ es la media aritmética de la población.

Mediana es una medida estadística que representa el valor que ocupa la posición central en una muestra. Para calcularlo los datos deben ordenarse de menor a mayor e identificar el dato que ocupa la posición central. Si el tamaño de la muestra es par, la mediana es el promedio de los dos valores centrales. Si el tamaño de la muestra es impar, la mediana corresponde al valor ubicado en la mitad de la muestra. A diferencia de la media, la mediana no es afectada por la presencia de datos atípicos. Sin embargo, al ser una medida de ubicación o posición, se recomienda que sea una variable complementaria, la cual puede brindar información útil si es comparada con la media.

Siguiendo lo dispuesto en el Artículo 2.2.1.1.1.5.3. Del Decreto 1082 de 2015, La Gobernación de Córdoba fija los siguientes indicadores como requisitos habilitantes de capacidad financiera y Organizacional de la **Mediana** así;

Tabla Indicadores de capacidad financiera

Indicador	Fórmula	Margen
Índice de liquidez	Activo corriente dividido por el pasivo corriente	Mayor o igual a 2.02
Índice de endeudamiento	Pasivo total dividido por el activo total x 100	Menor o igual a 45%

Tabla Indicadores de capacidad organizacional

Indicador	Fórmula	Margen
Razón de Cobertura de Intereses	Utilidad Operacional / Intereses	Igual o mayor 4.93
Rentabilidad de Patrimonio	Utilidad Operacional / Patrimonio x100	Mayor o igual a 18%
Rentabilidad de Activo	Utilidad Operacional / Activo x 100	Mayor o igual a 11%

4. Valor estimado del contrato

El numeral 4 del artículo 2.2.1.1.2.1.1. del Decreto 1082 de 2015, dispone: "(…) Los estudios y documentos previos (…) Deben permanecer a disposición del público durante el desarrollo del Proceso de Contratación y contener los siguientes elementos, además de los indicados para cada modalidad de selección:

(…) 4. El valor estimado del contrato y la justificación del mismo. Cuando el valor del contrato esté determinado por precios unitarios, la Entidad Estatal debe incluir la forma como los calculó y soportar sus cálculos de presupuesto en la estimación de aquellos. La Entidad Estatal no debe publicar las variables utilizadas para calcular el valor estimado del contrato cuando la modalidad de selección del contratista sea en concurso de méritos. Si el contrato es de concesión, la Entidad Estatal no debe publicar el modelo financiero utilizado en su estructuración. (…)

Teniendo en cuenta que la entidad necesita satisfacer la prestación de servicios cuyo objeto se describe a lo largo de los estudios previos y que le ejecución de la misma se encuentra enmarcada en el desarrollo de actividades individualizadas y colectivas se hace necesario establecer la metodología por la cual se determinan y soportan los valores unitarios.
La metodología adoptada por la Entidad, corresponde a la directriz contemplada en la *Guía para la elaboración de estudios del sector*, donde se recomienda entre otros y según su pertinencia, la utilización de fuentes de información como criterio para sustentar los precios unitarios que se aplicaran a las actividades a contratar por la entidad. Colombia Compra eficiente, con base en la guía mencionada ha caracterizado como fuentes de información pertinentes, cotizaciones, consultas en bases especializadas y precios históricos.

Teniendo en cuenta lo anterior y en aras de satisfacer el requisito legal establecido en el Articulo 2.2.1.1.2.1.1 *Estudios y documentos previos* del Decreto 1082 de 2015, la Gobernación de Córdoba basa su análisis de mercado en tres cotizaciones y determina establecer su presupuesto oficial en el promedio unitario de los ítems requeridos en las especificaciones técnicas.

El objetivo del presente estudio de mercado, es establecer los precios de referencia de los ítems relacionados en las especificaciones técnicas para la ejecución del objeto contractual, los cuales tendrán la figura tipo bolsa y se irán agotando en la medida que se requieran los mantenimientos y reparaciones programados que puedan surgir en el desarrollo de las actividades misionales de la entidad.

Para determinar el valor promedio unitario de los ítems requeridos en las especificaciones técnicas de la presente contratación, el área requirente invito a cotizar a través de correo electrónico a tres (3) talleres de servicio técnico de la región que cumplen con las exigencias mininas requeridas para ejecutar el objeto.

De acuerdo a las cotizaciones recibidas, se realiza el análisis comparativo de los ítems ofertados con el fin de obtener el valor promedio base, obteniendo el siguiente resultado:
