energy is the key to our future. If we do not use it, our
planet will not survive. We do not have enough resources on
Earth to supply our energy needs. We are slowly using solar
energy more. Most places you go in the world today you can
solar panels on people's houses. I hope that in the future,
houses will use solar power. It's so simple. In fact, it's free
you have to do is pay for the solar panels and some oth
equipment, and then you have free energy. Research i
energy is still in its early days. I think in the future it
everywhere. We'll be able to buy solar panels from ou
store. I also think we'll be wearing clothes that provid
power, and we'll be driving cars powered by solar energy.
