5: In the Company Casona Artesanal S.A.S the following dangers were identified:

1: Biomechanical danger: Due to prolonged postures, repetitive movements, manual handling of loads

2: Danger safety conditions: Mechanical (elements of machines or tools to be worked on)

3: Chemical danger: By handling silica, particulate matter and organic and inorganic dusts

6:

New government regulations mean that we are all required to be more aware of risks in the workplace. As a employer, we will provide our employees with the necessary safety equipment. They must wear goggles to protect your eyes when working on this machinery. They should also wear ear protection because the noise from the machines is high enough to cause damage to their hearing. And of course, there are a

lot of dust in the air, so they have to wear masks to stop breathing it in. But in the end, they are responsible for their safety and for preventing accidents happening.

Remember that it is very dangerous to smoke near the store chemical. In fact, we have a no smoking policy throughout the company. Chemicals themselves are, of course, poisonous so they should never enter your mouth. They could causes burns if you get them on your skin. If somebody leaves them without a lid, fumes may escape and cause headaches, drowsiness or dizziness.
