What you need to do

Follow the steps below to activate your license.

You need to register every new Firewall. If we've sent you license keys, you also need to apply those.

The setup process will ask for your serial number and/or license key. You can only use each of them once. The steps are:

1. Go to https://central.sophos.com/ and sign in (if you don't already have an account, then **start a Sophos trial**).
2. In **Sophos Central Admin**, click **your account name** (it's in the upper right of the page).
3. Click **Firewall Licenses** at the top of the page, then click **Claim Firewall**.
4. Follow the registration steps. When you finish, the firewall will appear in the list.
5. If you're installing a hardware appliance, skip this step. If you're installing a virtual appliance from **Firewall Details** > (serial number) > **Download Installers**, go to the Sophos Firewall help and search for "Virtual and software appliances" to get instructions.
6. If you want to manage the firewall from Sophos Central, do as follows:
    a. In Sophos Central navigate to **Firewall Management > Firewalls**
    b. Click **Add** in the firewall details management column and follow the instructions to connect your firewall to Sophos Central.
7. If you have any license keys to activate, see the instructions below.

New subscriptions

In the Firewall, go to **System > Administration > Licensing** and click **Activate Subscription**. Then enter the license key.

Other ways to activate your license

You can activate your license in other ways, for example without access to the appliance. See https://community.sophos.com/kb/122671.

Upgrade or renew a license

If you have ordered an update or renewal of an existing license our systems will have automatically updated your license. The firewall will pick up the updated license at its next daily license sync, which can take up to 24 hours. If you want it to get the license right away, open its web admin console, go to **System > Administration > Licensing** and click **Synchronize.**
