I work part-time at Lawson's at night. My problem is that the person I work with steals things from the store, sometimes money and sometimes food. If I tell my boss, the other person will know that I told. However, I'm also afraid that the boss will think I'm the one stealing. What should I do?
TIPS
You should tell your boss at once, then the situation begins to worsen, maybe the subject makes the decision to continue stealing the things or objects of greater value, you must do what is possible for this situation does not affect you. You have to act immediately, in case your boss does not believe your word, you must give him strong evidence that they are stealing from your work, placing security cameras among other things, you must not let the situation go unnoticed.

ADVICE IN RESPONSE TO THE SITUATION
You should sit down to talk with your husband explaining that it is an excellent job opportunity, where your contribution of money would help them to obtain better economic stability, asking him if he is willing to support you in your goal of entering to work in an excellent company where you will demonstrate all your skills, virtues and capacities achieving an advance in your work experience, where it will be the beginning of many dreams to achieve, that what you need right now is their unconditional support, that even if they do not share so much time together you will always be attentive to what the need, asking what is your biggest fear that you enter to work in that company.

Of my consideration

Receive a cordial greeting, by means of the present I write to you with the purpose of requesting a salary increase.

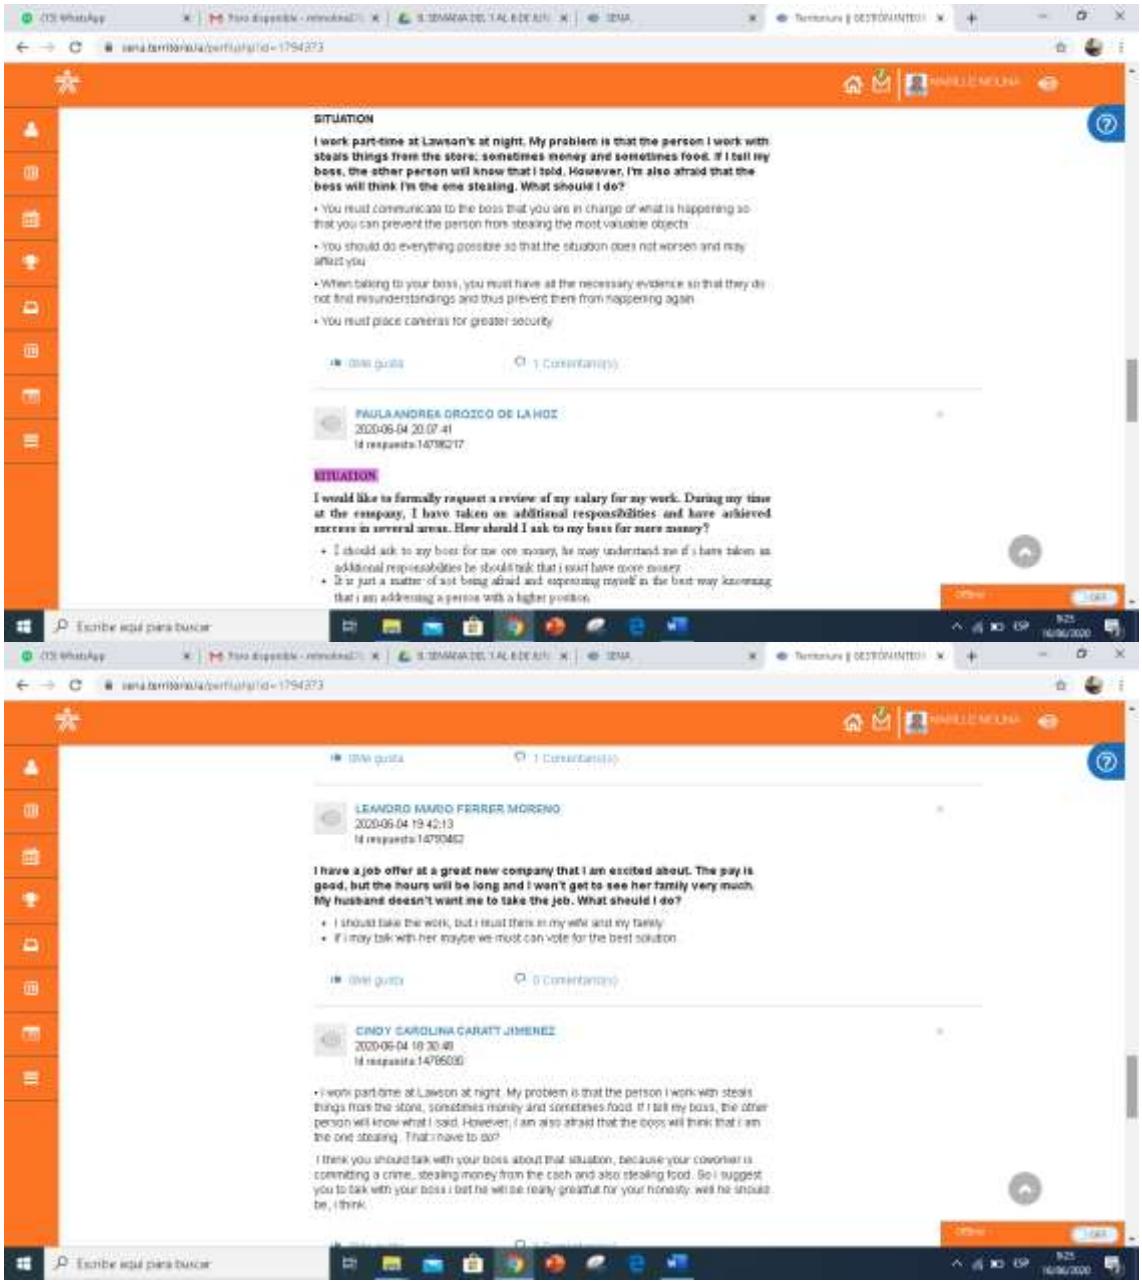

I have been working for the company CONFECCIONES Y BORDADOS JORDAN for 6 years, during this time he has always been open to take part and participate in an event that is planned and when I am asked to do some additional work or activity, I am always ready to accept responsibility. I think the company's record of my work, my most recent accomplishments, as well as an average salary at various sites and companies, demonstrates and justifies the reason for the request for a raise.

• You must communicate to the boss that you are in charge of what is happening so that you can prevent the person from stealing the most valuable objects
• You should do everything possible so that the situation does not worsen and may affect you
• When talking to your boss, you must have all the necessary evidence so that they do not find misunderstandings and thus prevent them from happening again
• You must place cameras for greater security

I think you should talk with your boss about that situation, because your coworker is committing a crime, stealing money from the cash and also stealing food. So i suggest you to talk with your boss i bet he will be really greatful for your honesty. well he should be, i think.

1. You should talk to your boss about the situation that is happening.
So you will prevent your boss from thinking that you are involved.

I should sit and talk to my partner as adults, clarify that there may be changes in the relationship, but it is what I want and yearn for in life, and a person who supports me

I should sit and talk to my partner as adults, clarify that there may be changes in the relationship, but it is what I want and yearn for in life, and a person who supports me that this is there when I need it would be the best, it should also ask how that person feels in front of the situation and what do you think of what I'm saying.

What a story

Stephen William Hawking, a well-known scientist from Oxford, studied physics at Oxford University. When he was 21 and was doing studies on the universe at Cambridge University, the doctors found he had a neuro motor problem. Later, his problem got worse but he wanted to finish his studies. He thought he was going to live only a few months because most people like him only live for 18 months after diagnosis. In 1985, he had an operation and lost his ability to speak. At first, he could talk by spelling words moving his eyes when someone showed him a letter. Then, he was able to choose words from a computer screen with a switch.
In 1998, his first book, which was about the universe, was very popular, but many people did not finish it because it was difficult to understand. In 2005, he wrote a simple version called A brief History of Time.
“Before I got ill, my life was boring,” he said. But then he had dreams about giving something good to the world, so he began to improve his work and now we can understand the universe better. He said his success came from the help of his wife and children, other people, and government organizations. Hawking worked as a Lucasian Proffessor of mathematics at the University of Cambridge, a job that Newton also had had in 1663.
