Energy Star® Qualified UPS Products

VERTIV.

Mission

The ENERGY STAR® Program was established by the U.S. Environmental Protection Agency (EPA) as a way to identify and promote energy-efficient products. Its goal is to reduce energy consumption, help consumers save money and aid in the protection of our climate through superior energy efficiency.

The ENERGY STAR UPS Program helps customers make informed decisions when designing, applying and purchasing, energy efficient uninterruptible power sytems (UPS), from small server deployments to large data centers. ENERGY STAR qualified UPS products use an average of 35% less energy than their legacy counterparts.

Following is a list of Liebert® UPS products tested and qualified to bear the ENERGY STAR mark.
