

M4E

Intelligent Agriculture is the trend of all over the world. And the intelligent drone act as a important role in this world plan.

TTA Agriculture spraying drone can replace the traditional pesticide sprayer and it's speed is 40times of the traditional sprayer. It will save 90% water and 30%-40% pesticide. Small droplet diameter make the pesticide more well-distribute and improve the effect. At the same time, it will make the people faraway from the pesticide and reduce the pesticide remain of the crop.

Make the life more healthy, make the world more efficient.—TTA

DIMENTION	Diagonal Wheelbase	1090mm
	Folded Height	485mm
	Container Material	Tough Plastic
	Container Volume	5KG
FLYING	Full Payload Flying Time	5min
	Empty Payload Flying Time	25min
	Flying Speed	0-15m/s
	Flight Radius	1.5km
	Flying Height	3500m
	Landing Approach	Vertical Take-off and Landing
	Wind resistant	10 meter per second
SPRAYING	Spray Droplet Diameter	80-200μm
	Quantity of Nozzles	2 pcs
	Recommend Spray Speed	4-6 m/s
	Spray Width	4-6 m
	Spray Height	2-4 m Above Crop
	Work Efficiency	1.8-2.5 acres/10min
