Executive summary

Executive Summary provides a high-level health status for entitled assets to assist with equipment operation.

We have found **no Schneider Electric 1 - Phase UPSs** to be included in Executive Summary at this time.

Support for additional product lines to be included in the future reports.

Insights section is dedicated to entitled assets. Detailed recommendations and actions for each Health Indicator and Insight are outlined in the following pages.

Health Indicators & Insights Legend

No Action identified | Investigation Required | Action Required | Insuficient information

Insights

Asset Connection Uptime	5	0	0	0
Asset Advisor Contract Coverage	5	0	0	0

Data and information presented in the *Executive Summary* and *Recommendations* is based on average usage according to expected product lifecycle and design specification.

Recommendations should be used for information purpose only.

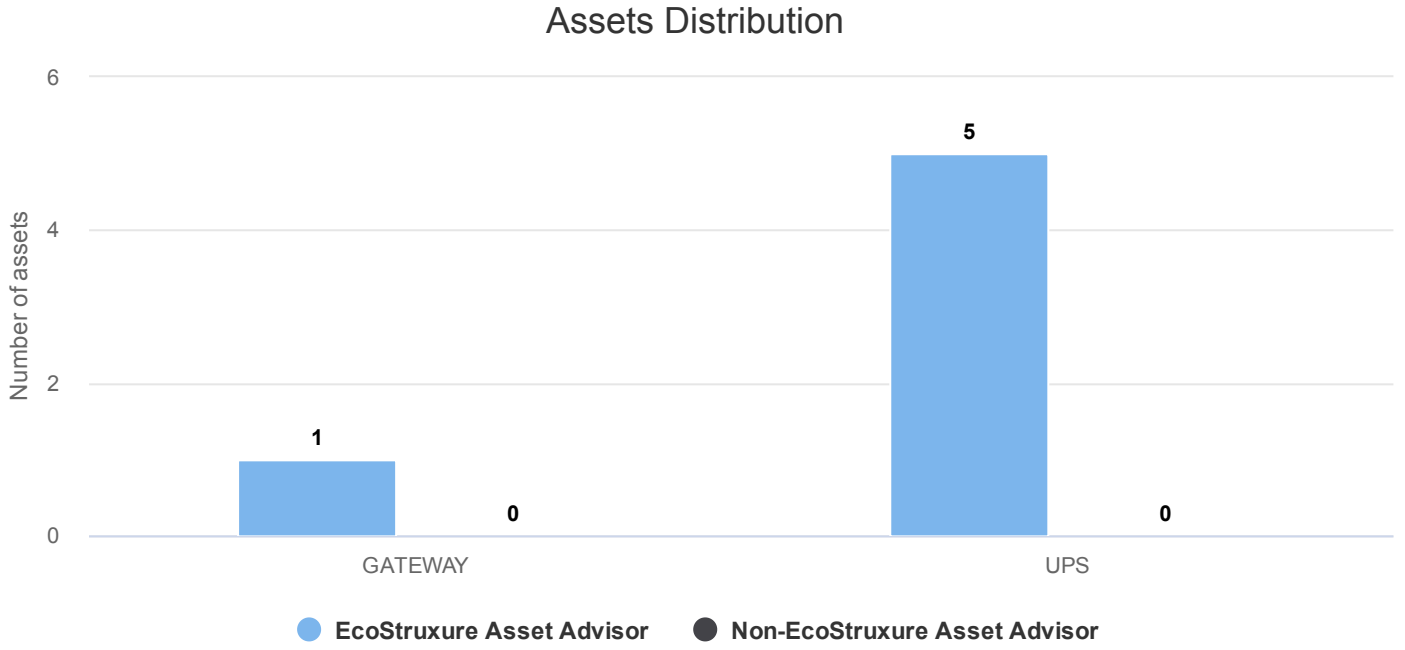

Investigation at the product level is required to confirm actual asset health.

Life Is On Schneider Electric

Summary

Connected assets

You have **6** assets connected to EcoStruxure Asset Advisor

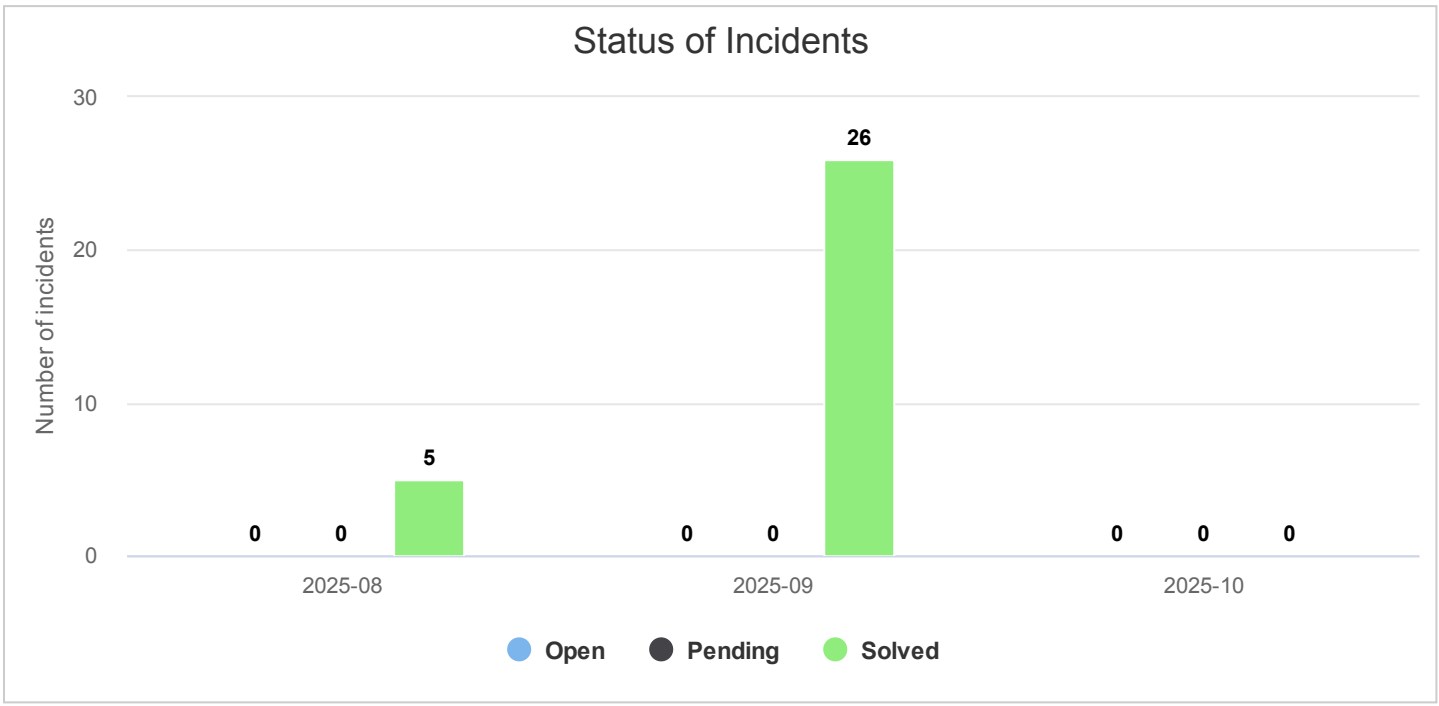

In the connected assets chart, you can see which types of asset you have connected, and whether they are covered by EcoStuxure Asset Advisor, or other types of service.

If you have questions regarding your connected assets, or wish to add coverage to more assets, please reach out to your Connected Services, you can see their contact information on the last page of this report.

Life Is On Schneider Electric

Incident status

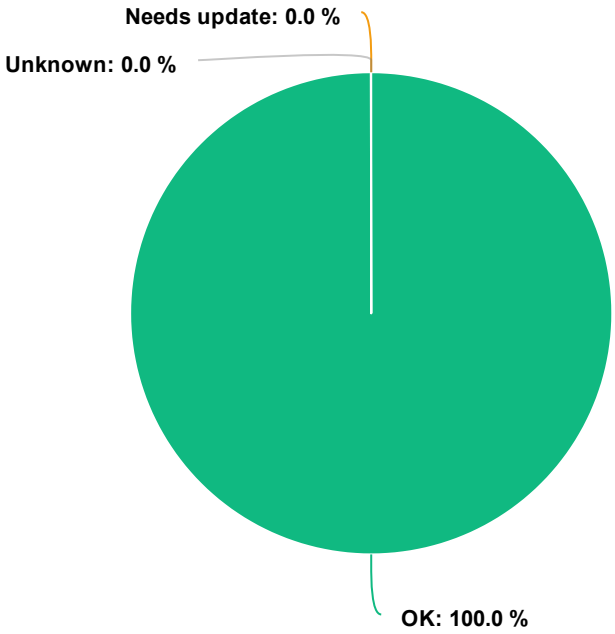

Status of incidents in the last 3 months

Life Is On Schneider Electric

Firmware status

This chapter focuses exclusively on firmware assessment for Network Interface (often referred to as Network Management Card – NMC).
You have **0** assets in need of firmware update, **5** assets with up-to-date firmware versions and **0** assets with no available information regarding the firmware status.

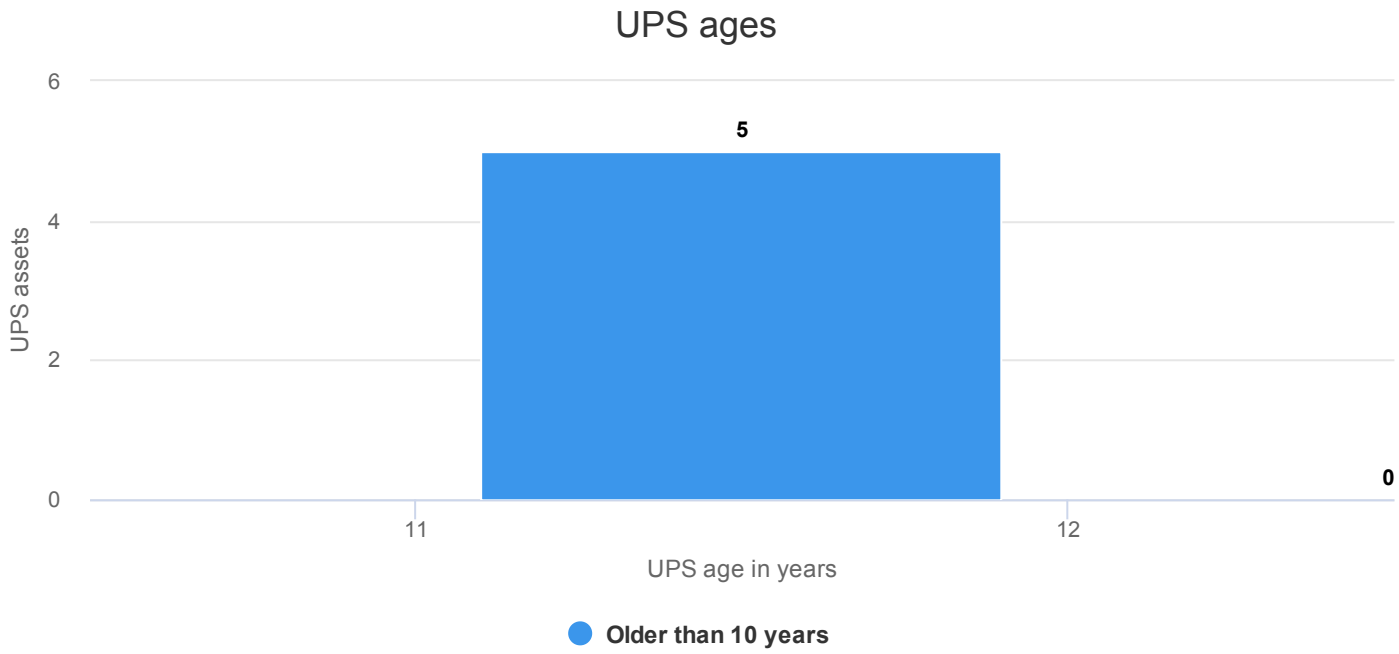

New versions of firmware are made available for the management cards within your physical infrastructure devices throughout the year. These releases typically contain a mix of bug fixes, new features, and general enhancements. Additionally, they often contain security related fixes that patch known vulnerabilities in commonly used network protocols or add features specific security. It is generally recommended to be on the latest firmware available.

Life Is On Schneider Electric

UPS ages

You have **5** out of 5 UPS-s above 10 years of age.

The summary graph shows age of UPSs across all connected products.

Different UPS products have different life expectancy (average expected lifetime between 10 and 15 years).

Please check UPS's older than 10 years.

Top 5 highest UPS ages

	Asset	Location	Serial #	Age
1.	UPS 3B	No Site level hierarchy allocated	ID1414000316	11.67 year(s)
2.	UPS 2B	No Site level hierarchy allocated	ID1416000380	11.58 year(s)
3.	UPS 1A	No Site level hierarchy allocated	ID1423000358	11.42 year(s)
4.	UPS 1B	No Site level hierarchy allocated	ID1444000344	11.08 year(s)
5.	UPS 2A	No Site level hierarchy allocated	ID1448000491	11.00 year(s)

Life Is On Schneider Electric

Software

Gateway versions

Recommended gateway upgrades: **0**

	Asset	Location	Current	Latest	IP
1.	Gateway-Aerocivil	No Site level hierarchy allocated	2.0.1.3	2.0.1.3	10.200.0.14

Life Is On Schneider Electric

Conclusion

1. In the past month there were no incidents at your installation.
