In the AI era, Huawei actively embraces and integrates AI into campus networks to upgrade wireless, security, application, and operations and maintenance (O&M) experience. These advancements pave the way for experience-centric 10 Gbps wired and wireless networks that support emerging use cases such as smart campuses, mobile finance, and digital healthcare.

• **Wireless experience upgrade**: In 2025, Huawei unveiled the industry's first 5-radio Wi-Fi 7 access point (AP), further strengthening its leadership in next-generation Wi-Fi. With cutting-edge technologies like intelligent digital pre-distortion (DPD) and intelligent Coordinated Scheduling and Spatial Reuse (iCSSR),

s experience.

• **Security experience upgrade**: Huawei has further enhanced its Wi-Fi Shield portfolio, now supported by 13 AP models best suited for indoor, outdoor, IoT, and high-density environments. Innovations like secure

faults, Huawei enables a single person to efficiently manage a campus of over 10,000 users.

Looking ahead, Huawei will continue to innovate around customer needs and advance AI-powered campus network deployments. In addition, Huawei will collaborate closely with ecosystem partners to help enterprises build "AI Campus"—enhancing network experiences and operational efficiency and fostering shared success in the AI era.
