Bacteriological Petri Dishes

Bacteriological Petri Dishes

Single-use Petri dishes for microbiological procedures, as well suspension culture or plant cell culture

Share to:

Product Description

- Non-cytotoxic virgin polystyrene, excellent optical clarity
- Engineered for optimum flatness to provide uniform agar thickness
- Single or more vents are available: novented for anaerobic and long-term work, single vented for limiting gas exchange, multi vented for improving gas exchange

General petri Dishes

Ø90 and 150mm Petri dishes are manufactured in accordance with standard ISO 24998:2008, ideal for use with most automatic plate pourers
