## Manage and Assign Licenses

Manage and assign licenses to each developer ensuring that individuals within your organization are sent notifications regarding product upgrades and new releases. Each person assigned a license will also be able to submit support tickets and install products using their own login. This is strictly optional, but we highly recommend assigning licenses when you own more than one DevExpress product.

### Licenses Assigned to You (by others)

Product	Expiration Date	Current Version	Assigned By
No licenses have been assigned to you			

### Licenses You've Purchased
