Dear Rentametric International Inc.,

Subject: Announcement regarding the current production situation of 96S, 45S, and CT60

We hope this message finds you well. We would like to explain the current production situation of 96S, 45S, and CT60.
Please see the information below:

The extended lead time for the 96S and 45S kits is primarily due to unstable production of the CT60, which is included in both kits.

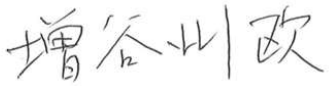

Shipments will be allocated based on distribution across various regions and countries managed by Fujikura's official distributors. The initial allocation volume is expected to be announced during the week commencing March 9th.

There will be no shipments until March 15th, and currently, we are unable to provide exact estimated time of departures (ETDs) for the complete 96S and 45S kits.

The 96S and 45S units themselves are being manufactured and are currently available in stock, but without the CT60.

We acknowledge the difficulties this is causing for yourselves and our customers, we are fully aware of the severity of the situation, you can be assured of our best efforts to improve it. We appreciate and thank you for your ongoing co-operation during this difficult period.

Should you have any questions or need clarification, please do not hesitate to contact your account manager directly for details, thank you.

Shuo Masutani
