FAX: (713) 798-4364

September 6, 1995

TO WHOM IT MAY CONCERN:

Dr. Mauricio LaTorre, participated in an International Visiting Physician Program beginning July 3, 1995 through September 15, 1995, with Dr. M. Bowes Hamill in the Department of Ophthalmology at Baylor College of Medicine.

During the time of his observership, he observed both in the clinic and the operating room under the direct supervision of Dr. M. Bowes Hamill. Dr. LaTorre had the opportunity to observe and discuss a variety of techniques including cataract extraction by extracapsular techniques, as well as phacoemulsification, clear corneal extractions, foldable and non-foldable intraocular lens implants, corneal transplantation, anterior segment reconstruction, iridoplasty, open globe repair, and other anterior segment and corneal procedures. Additionally, one day per week, Dr. LaTorre practiced various anterior segment techniques including phacoemulsification and corneal transplantation in the microsurgical training laboratory.

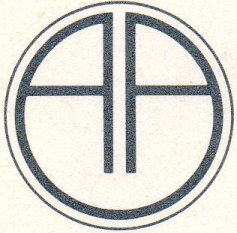

In addition to his clinical work, Dr. LaTorre participated in two ongoing research projects. These projects were the collection and analysis of a series of cases of dacryocystitis following punctal occlusion and induced astigmatism following cataract surgery through an arch incision.

Dr. LaTorre also participated in other departmental conferences including weekly Grand Rounds, Clinical Conferences, and lectures.

Sincerely,

A handwritten signature in black ink, appearing to read "M. Bowes Hamill".

M. Bowes Hamill, M.D.
Associate Professor of Clinical Ophthalmology
