Subject: **Radioactive Material, Excepted Package - UN2911.**

To Whom It May Concern-

Please be advised that Trijicon products contain very low amounts of radioactive material. The radiation source is Hydrogen-3, commonly known as Tritium. Because the amount of radioactive material is so low, our products meet the criteria to be transported as “excepted packages”. In other words, when we ship, our packages contain such low levels of radioactive material that the potential hazards are insignificant and they are exempt from any additional hazardous material shipping requirements. In accordance with the US DOT and IATA standards, our packages must simply bear a marking which identifies it a Radioactive Material, Excepted Package - UN2911.

There is no Hazardous Material/Dangerous Goods shipping document required for this shipment. This is consistent with US DOT Regulations 49 CFR 173.421.

Should you have any question, please feel free to contact us.

Thank you,

Brad Romines – Director of Trade Compliance
