The importance of English, the universal language per excellence. Beyond being a language, English is a professional and cognitive advantage that facilitates access to knowledge of all kinds. As an English teacher, I am passionate about teaching English, bilingualism and the web.

At present, the sciences of humanity is aspects such as science, communication, technology and product marketing. They require the training of a person to handle two or more languages, English being the most important to achieve it is the universal language per excellence.

My story English:

1. To work
2. Education and information
3. Vacation
4. Other cultures
5. Travel
6. The most learned language
7. Self-improvement
8. Art and literature
9. Better skills
10. Because it is the universal language
