Event Planning Project

In groups of maximum three students, you will plan and present a formal event related to the Data Networks field. The objective of this activity is to practice:

- Future forms in English
- Giving directions and movement expressions
- Professional vocabulary related to networking and technology
- Oral communication and teamwork

1. Create a Formal Event

Your group must invent and organize a professional event connected to Data Networks. Examples:

- Network Security Conference
- Cybersecurity Workshop
- Data Center Tour
- Cloud Computing Seminar
- IT Support Training Day

You may be creative, but the event must sound realistic and professional.

2. Include the Following Information

A. Basic Event Information

Explain:

- Event name
- Date and time
- Location
- Target audience
- Purpose of the event.

B. Future Structures

Use future forms correctly throughout the presentation.
You must include examples with:

- **Will**
- **Going to**
- **Present Continuous for future arrangements**

C. Event Activities

Describe the activities planned for the event.

Examples:

- Presentations
- Workshops
- Simulations
- Technical demonstrations
- Networking sessions
- Equipment exhibitions

D. Directions and Movement Instructions

Your group must explain how attendees can move around the event location.

Use:

- Prepositions of movement
- Direction expressions

You should include expressions such as:

- Go straight
- Turn left/right
- Walk past
- Go across
- Go through
- Next to
- Between
- Opposite
- Into / out of
