USB CAMERAS

The new Motic sCMOS cameras developed by German engineering represents a new impetus to manufacturing quality, technical precision and lightweight design. With a member of this line the door for new application fields opens wide. The accelerated data readout (Global Shutter) also enables to work on fast moving phenomena.

If it is about maximum resolution for printing purposes, MotiCam S12 is your choice. A 25fps maximum frame rate manages the largest data volume of Motics S Series. If resolution in display or for printing is in your mind, MotiCam S12 is your solution.
