Pre-A1	**A1**		**A2**		**B1**		**B2**		**C1**	

Grammar

Uses a mix of simple and complex structures, but with limited flexibility. May make frequent mistakes with complex structures though these rarely cause comprehension problems.

Vocabulary

Uses vocabulary resource flexibly to discuss a variety of topics. Uses some less common and idiomatic vocabulary and shows some awareness of style and collocation, with some inappropriate choices. Uses paraphrase effectively.

Fluency

Speaks fluently with only occasional repetition or self-correction; hesitation in speech is usually content-related and only rarely to search for vocabulary or grammatical constructs. Develops topics coherently and appropriately.

Pronunciation

Uses a wide range of pronunciation features. Sustains flexible use of features, with only occasional lapses. Is easy to understand throughout; First language accent has minimal impact on intelligibility.

Performance per Question

Question 1

What kind of music do you enjoy listening to, and why?

Transcription

I actually like a lot to listen to music in Spanish. It is a great language and it makes me feel so comfortable, of course, because I'm native from Spanish and it's my mother language, so I really, really love to listen to music in Spanish, most likely the Latin music. I really love merengue and salsa music. This kind of written. I really like like what I feel the most comfortable with and I really enjoy it. A lot of singers in Colombia and in Latin America, they make great music like Juan Luis Guerra or Fonseca or Juanes. This is just a lot of great singers and I can they're like countless of singers that I could tell. But what I would like to remark is music in Spanish is such a romantic genre and also the fact that the Spanish come from romance like a romantic kind of language. It it makes me so happy and so I really enjoy listening to.

Question 2

In your opinion, what is the best professional career, and why?

Transcription

In my opinion, the best professional path or career will always be tech. Technology is everywhere. Technology is something that we are going to use every single day, and technology is the foundation of a lot of our relationships. Today we use technology every single day for everything that is around us. So if someone would ask me what the best career biases or what the best career pathway is, I'm always gonna say technology 'cause it is gonna open doors everywhere. And technology is always related to mechatronics. Electronics or Software or? Artificial intelligence. Intelligence, which is something that is. Gonna be a main thing in the next few years, so technology is always the best. There is plenty of different careers that are related to technology as I mentioned before, so to be specialized in one of these areas is one of the most important, like having in mind what's the best and going through technology.

Question 3

What do you think is the best way to learn something new, and why?

Transcription

The best way to learn something new is gonna be always to watch two people talk about that topic or about that language or about that area that you wanna learn. For me, in my case it's always it always helped me like to focus and comprehend what the topic is and not to deviate in the different other topics or stuff. So for me it's always watching through videos or watching through live podcasts or watching. Through serious or TV shows that are main that their main focus be this topic is it's something that it's always gonna help not just me, but I know a lot of people that this kind of exercises also help them to. To be like the person that they wanna be in to be, to to arrive to to get the point that they wanna get. So for me, it's always the best idea and it's it's like the best pragmatic way to be on point and learn something new.
