Quality Certificate

Greatly improved stability over the L-glutamine supplement, L-glutamine is an essential amino acid and a key component of culture media, serving as a major energy source for propagating cells. It is very stable as a dry powder and as frozen solution but degrades rapidly in liquid media or stock solutions, producing toxin compounds. Optimal cell performance usually requires supplementation of the media with L-glutamine prior to use. L-alanyl-L-glutamine is a stabilized dipeptide form of L-glutamine which does not degrade in liquid media during storage or incubation, providing superior results in several applications. Complete Certificate of Analysis available for each production lot, along with full formulation information Manufactured in a facility that complies with ISO 13485 certified quality system. This product is produced under high quality industry standards

This product is non-returnable. If you have any questions, please contact us immediately.

Details

Product Number	25-015-CI
Qty./Pk	1 / Pk
Qty./Cs	1 / Ea
Brand	Corning®
Weight	3 mg
Storage	2 to 30°C
Storage Recommendation	2 to 30°C
